

The Abundance GAME (TAG)

The Abundance GAME - is a hybrid empowerment/experimental game that's designed to help us explore our individual and collective potential, through the co-creation of a more fruitful, regenerative, meaningful and stable present and future for life on earth.

It's just a game ... until it isn't!

The Abundance GAME is a 'Governance And Money Experiment', seeking to demonstrate that it's entirely possible for sovereign people to co-create a new harmonious paradigm, one in which we have the freedom to live a full and meaningful life in a thriving natural environment.

The fun and dynamic nature of the game!

The primary aim of the game is to showcase the amazing power, creativity, skills and talents that lie deep within each and every one of us, and from there, co-create a platform where we can collaborate and experiment with the many innovative concepts, technologies, products and services that have the potential to contribute to a healthy, regenerative and prosperous future. We can achieve this, and more, using decentralised and sovereign [DHO's](#) and [DAO's](#)!

"Imagination is more important than knowledge. For knowledge is limited to all we now know and understand, while imagination embraces the entire world, and all there ever will be to know and understand." **Albert Einstein**

Now Imagine!

Co-creating a decentralised exchange mechanism, with the potential to become a free-flowing conduit for the greatest wealth transfer in human history. Imagine transforming our degenerative and degrading economic and governance systems, into a regenerative, thriving and inclusive economic model, that directs funding towards projects, services and enterprises that bring true health, joy and value to life. This is the purpose of the Governance And Money Experiment, it's time to play the 'global elites' at their own GAME!

Game Backstory

A global [Cartel of Cartels](#) has infiltrated and corrupted our governments, regulators and public institutions and are debasing the quality of life for people in communities everywhere, extracting our wealth through programmed consumption, illusory taxation and nefarious governance, and doing so with impunity. CoC's biggest weapon of influence and dominance (and possibly its biggest weakness) is absolute control of the means of exchange, aka Money As Debt ([MAD](#)), or the probably more dystopian vision of Central Bank Digital Currencies ([CBDC's](#)).

*"Many people are confused about what legal tender means. It's actually about settling debts rather than how you can pay for things ... Debit cards, cheques and contactless aren't legal tender anywhere. Confused? Let us help you out. A shop owner can choose what payment they accept. ... If your local corner shop decided to only accept payments in Pokémon cards that would be within their right too ... Legal tender has a narrow technical meaning which has no use in everyday life ... The reason money works when you pay for things is because people trust in its value. Historically, you could exchange banknotes issued by us for gold. But the link between notes and gold was broken a long time ago, so nowadays it makes more sense to think of money as a kind of IOU (I owe you)." **Bank of England***

The Teams in the GAME

Cartel of Cartels (The CoC)

The primary objective of CoC players, is a quest for power and control of Humanity through wealth and energy extraction for personal gain. They fulfil this objective through complete control of governments, the media, the money supply, planetary resources and human endeavour, no matter the cost to the quality of life and livelihood for the rest of us.

Band of Sovereign Souls (The BoSS)

The primary objective of the BoSS players, is a quest to build a new regenerative economy, with the purpose of co-creating a sovereign socio-economic model that supports individual and collective health, prosperity and wellbeing.

Setting the stage

All of Humanity, and that includes You and Me, are being governed and controlled by an extremely powerful, unelected and secretive global cartel that has usurped the governments of every nation and replaced them with Bureaucratic States (BS), with the entire BS network answering to the Cartel of Cartels, a.k.a. the CoC.

The Abundance GAME provides every Sovereign individual constituting the BoSS, with the necessary tools and resources to become a serious challenger to the oppressive dominance of the CoC and its network of BS proponents.

“Fortunately for us, there is a vital target for us to strike; one foundational element that the entire system is built on and cannot stand without: the Network's control of money. This is their primary weapon, and it is well within our power to take it from them.”

Tragedy & Hope 101 - Joseph Plummer

“Genius is making complex ideas simple, not making simple ideas complex.” **Albert Einstein**

Here is a simple GAME formula for groundbreaking and monumental change!

The Peoples' Own Treasury (TPOT)

‘Pushing the reset button on our terms, before the CoC does it on theirs’

1 x [Satoshi](#) (secure reserve) = 5 x ‘[Bradbury Pounds](#)’ (debt-free money)

∴ 10 x ‘Bradbury Pounds’ = 1 x PALS [£10 pure gold note](#) (physical cash)

[A Peoples' Mandate](#) and [A Debt Jubilee](#) is all we need to make it happen Collective agreement and the push of a button is all it takes!

Take control of your identity, your health, your money, your government,
your local food, water and energy supply ...

... Take control of your life!

‘PUSH THE BUTTON’

Now that you know who we're playing against, are you ready to join the BoSS team to challenge the status-quo and win back our freedom, prosperity and self-sovereignty?

Do you think you have the courage to play the Cartel of Cartels at their own money and power game, in the most intelligent, creative and fun way? The first level of the game begins with the objective of reclaiming our sovereignty and introducing innovative tools and technologies that support decentralised health, food, water and energy security, through community-led Regenerative DHO's (pronounced 'do's').

Value In People (*We're all VIP's* 😊)

Keep in mind that the debt-based financial and economic system of today was designed by and for the personal gain of a very select few. Also keep in mind that the primary source of power for this flawed system, is our collective agreement to its use and our affording debt a value that's wholly overstated and undeserved. Surely this knowledge makes it easier for us to comprehend, that we are the very market on which every financial and economic instrument depends and draws its value from. This means that we have the collective power to take the market in whatever direction we choose ... because we are the market!

We are all one big connected tribe, here to experience life on the most beautiful planet we know, in the most significant and meaningful way possible. Creating the environment for this to happen, is up to each and every one of us individually and collectively!
